আমার কোর্স

1. Which of the following best defines quality?

> **1**   The adherence to strict manufacturing standards.

> **2**   The subjective perception of the product's value.

> **3**   The satisfaction of customer requirements in various aspects.   ✓

> **4**   The level of complexity in the product's design.

2. Software Quality Assurance involves:

> **1**   Only testing the software

> **2**   Only writing code

> **3**   Ensuring compliance with specified standards and processes   ✓

> **4**   Designing user interfaces

3. Which testing type is performed to verify if the individual units or modules of the software work as expected?

> **1**   System Testing

2	User Acceptance Testing

3	Integration Testing

4	Unit Testing	✓

4. What is the primary objective of a test case?

1	To document project requirements

2	To serve as a blueprint for coding

3	To validate that a specific functionality works as intended	✓

4	To estimate project timelines

5. What type of testing focuses on the software's functionality without considering its internal structure?

1	White Box Testing

2	Black Box Testing	✓

3	Grey Box Testing

4	None of the above

6. What are the different levels of Testing?

1	Integration testing

2	Unit testing

3	System testing

4	All of the above	✓

7. Which of the following is NOT a software quality assurance role?

1	QA engineer

2	Test Engineer

3	Software developer	✓

4	Test Automation Engineer

8. What is the primary goal of Software Quality Assurance (SQA)?

1	Debugging

2	Testing

3	Code Optimization

4	Quality Improvement	✓

9. What distinguishes Software Quality Assurance from testing?

1	Both focus on writing code

2	SQA focuses on ensuring quality, while testing identifies defects	✓

3	Both are unrelated to software development

4	Ignoring industry standards

10. Which of the following is a key principle of SQA?

1	Delay testing until the end of the development process

2	Testing is only the responsibility of the testing team

3 Correcting defects is more costly in the later stages of development ✓

4 Quality is solely the concern of the development team
